PAPER NUMBER

3653

DATE MAILED: 07/18/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/814,390	Applicant(s) HAND ET AL.	
	Examiner Jeffrey A. Shapiro	Art Unit 3653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 May 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-11 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones et al (US 6,363,164 B1) in view of Tedesco (US 2002/0065579A1).

As described in Claim 8, Jones discloses an automated teller machine (ATM) as shown in figures 1b-d, that has a processor-based controller and coin receipt and return functions. Note that Jones' ATM vends bills and coins to customers. See Jones, figure 1a and col. 6, lines 22-46, which indicates that a customer's deposit may be returned in either coins, bills or both, and that controller (10) causes the dispensing unit (22) to dispense funds to a user. Figure 1e, for example, illustrates dispenser (22), communications panel (26), image scanner (12), input receptacle (16), transport mechanism (18), and output receptacles (20a and b), all controlled by processor-based controller (10). Controller (10) also directs information from scanner (12), discriminator (14) to interface (24) which communicates further with remote accounting systems. Jones also discloses a front-end processor (6038) in figures 1u and 1v. See col. 11, lines 35-64. Jones at col. 16, line 56-col. 17, line 30 discloses scanning a bill for various image features and comparing them with stored information. See also Jones at col. 20, line 26-col. 22, line 15, noting EPROM (934), illustrated in figure 4a, and CPU 930. See

Art Unit: 3653

also Jones at col. 22, lines 30-56 and col. 26, lines 30-56. Jones at col. 27 line 56-col. 28 line 67 and col. 29 line 33-col. 30, line 26 describes microprocessor (212) storing obtained optical image and magnetic data from bills and comparing them with stored patterns stored for example in read only memory (232). Jones also discloses an escrow holding area in col. 77, lines 51-54.

As described in Claims 9-11, Jones further discloses a display (2402) in the form of a touch screen with various currency denominations the machine control will allow to be processed displayed as keys (2406a-g). See figure 50a or 57b as well as col. 66, lines 23-45, col. 72, line 60-col. 73, line 37, and col. 80, lines 49-59.

Jones does not expressly disclose, but Tedesco discloses a vending machine embodied as an automated teller machine (ATM). See Tedesco paragraph 60 and figure 2.

Both Jones and Tedesco are analogous art because they both concern currency handling, including paper money handling.

At the time of the invention, it would have been obvious to one of ordinary skill in the art to have embodied Jones' ATM as a combination ATM/vending machine that dispenses snacks and goods as well as handles bank transactions.

The suggestion/motivation to do so would have been to make profits at an ATM point of sale, as suggested by Tedesco's teaching and disclosure. See Tedesco paragraph 60 and figure 2. One ordinarily skilled in the art would have recognized the benefit of combining an ATM and vending machine because customers obtaining

Art Unit: 3653

money at the ATM may be more willing to make impulsive purchases, thereby resulting in increased sales of vended goods as compared to a free-standing vending machine.

3. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones et al (US 6,363,164 B1) in view of Tedesco (US 2002/0065579A1) and further in view of Katou et al (US 2004/0182677 A1).

Jones and Tedesco disclose the system described above.

Jones does not expressly disclose, but Katou discloses a vending machine in the form of automated teller machine (101), having a note acceptor-dispenser (1), a bill discriminator (30), a note box (60), a note hopper (40) that temporarily stores said notes, and a transportation unit (501, 502, 503, 504) in a combination such that said notes are transported to either a note box, a temporary storage or escrow box, or through the bill discriminator. See figures 6-13, 23-26, 30a-30c and 31. Also note the direction arrows of figures 6-13, 23-26, 30a-30c and 31.

At the time of the invention, it would have been obvious to one of ordinary skill in the art to have added the transport mechanism disclosed and taught by Katou illustrated in Katou's figure 6, for example, to the transport mechanism of Jones such that said notes are transported to either a note box, a temporary storage or escrow box, or through the bill discriminator as well as from input to output receptacles.

The suggestion/motivation for adding Katou's transport mechanism to Jones' would have been to prevent jamming of notes. See Katou, paragraphs 10 and 18. Further, it would have been obvious to use closed note boxes or cassettes or

Art Unit: 3653

magazines to receive notes rather than open receptacles as Jones discloses so as to promote automation of the note handling process.

Response to Arguments

4. Applicant's arguments with respect to Claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

Jones and Katou provide teachings for creating a bill handler as described in Applicant's claims. Tedesco provides teaching for using such a bill handler system in a vending machine, i.e., by creating a combination vending machine and ATM.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey A. Shapiro whose telephone number is (571)272-6943. The examiner can normally be reached on Monday-Friday, 9:00 AM-5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene O. Crawford can be reached on (571)272-6911. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 3653

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
